

YAU App — Meeting Notes with Mrs. K

Admin Panel

- **Uniforms** — Remove the uniforms section entirely
- **Member Section** — Filter dropdown should only display schools currently on the app. Remove all unnecessary member accounts and delete them.
- **Messages** — Fix scrolling issue within conversations. Admin should have the ability to delete specific member replies and remove messages — this functionality should only be accessible from the Admin Panel.
- **Delete Messages** — Admin should be able to delete full chats, including entire conversation histories.

Standings — System Overhaul

The standings system needs to be rebuilt. Currently, standings can only be entered for one team at a time, which is incorrect. The new system should work as follows:

When entering game results, the admin should be able to:

- Select both teams (Team A vs. Team B) via a dropdown based on school/team name
- Enter the final score (e.g., 14–0)

Once submitted, the system should automatically update both teams' records, including:

- Wins / Losses
- Points (if applicable)

Updates should reflect in both:

- The Admin Panel
- The App's Standings view

The goal is a game-based input system that automatically updates standings for both teams, rather than requiring manual entry per team.

App Updates

- **Auto Slides** — Add auto-slide feature with a 4–5 second delay. Reference Figma design for updated login slides.
- **Logo** — Update logo across all YAU App screens and update the App Icon.

Login & Create Account Screens

- Minimize the top portion of the screen so users can see what they're typing
- Keyboard should dismiss when navigating between fields

Registration — Part 1

- Placeholder labels must match their field name exactly (e.g., "First Name," "Last Name")

Registration — Part 2

- Screen should automatically scroll to show the top of the registration form
- Top portion should minimize to reveal all fields
- Keyboard should dismiss when done typing
- Placeholder labels must match field names (same fix as Part 1)

Other

- **Interested Sports** — Change label to "Select one or multiple sports"
-

Home Page

- **View All Button** — Fix broken button next to Upcoming Matches
 - **"Chat"** — Rename to "Messages" throughout the app
 - **Upcoming Match Cards** — Make each game card a clickable field
 - **Match Order** — Display matches in chronological order; upcoming matches first. Past games should not appear on the Home Page.
-

Schedule Page

- Make all match entries clickable fields
 - Display upcoming games first, in chronological order
 - The hamburger/line menu icon at the top right of the screen is not working — clarify its purpose and fix or remove it
-

Standings Page

- Remove "Spring Season" label
- Fix team name overlapping the grade band on iPhone

Profile Page (*currently labeled "Me" — rename to "Profile"*)

- Users should be able to edit or delete their own information, including phone number, email address, and child's information
- Fix: Notifications, Security, and Privacy settings are not functioning

Messages

- Remove the "From Admin" section — admin messages should fall under "All Messages"
- Rename "From Coaches" to "From Coach"

Bugs / Critical Fixes

- **App Restart Bug** — When the app is closed and reopened, Home screen buttons stop working
- **Push Notifications** — Not working at all
